

Electric Vehicle Charging Solutions

Home : Business : Community

GELCOservices offer a 3-4 hour charge with a cost effective charging solution for EV drivers. The EVSE-RS wall mount EV charger from AeroVironment in USA has proven to be robust with the charge regime, strong in construction and gives years of EV charge delivery service.

- Simple to install – with a dedicated 40A circuit breaker
- The EVSE-RS has internal RCD protection.
- No need for an external RCD installation.
